

# INTERCEPT® Program for ASSET PRESERVATION

## PROVIDING A SOLUTION TO COMBAT THE EFFECTS OF OXYGEN ON AMINE UNIT ASSETS

Improved reliability and reduced costs are the goals of any gas processor. High oxygen levels in the inlet gas can create processing issues, resulting in: a drop in processing capacity, capital spend and increased maintenance costs.

INTERCEPT metal passivator and corrosion control program can mitigate these problems and extend amine solvent life and unit reliability. Our program is designed to combat the effects of oxygen-based corrosion in your amine unit assets.

We actively monitor corrosion in real time, interpret amine analysis, and benchmark data against desired performance to:

- **Obtain a baseline** of current performance
- **Verify the effectiveness** of INTERCEPT
- **Analyze results** and make recommendations for future optimization

Nalco Water has a long history of providing proven solutions to increase operating efficiency, protect vital assets, and reduce Total Cost of Operations (TCO) worldwide.

Let us know how Nalco Water can help you achieve your goals.

## BENEFITS TO OUR CUSTOMERS

- **EXTEND AMINE LIFE**
- **ENSURE RELIABILITY**
- **CORROSION PROTECTION**
- **OPTIMIZE COST**

**Nalco Water, an Ecolab Company**

**North America:** 1601 West Diehl Road • Naperville, Illinois 60563 • USA

**Europe:** Richtistrasse 7 • 8304 Wallisellen • Switzerland

**Asia Pacific:** 2 International Business Park • #02-20 The Strategy Tower 2 • Singapore 609930

**Greater China:** 18G • Lane 168 • Da Du He Road • Shanghai China • 200062

**Latin America:** Av. Francisco Matarazzo • n° 1350 • Sao Paulo – SP Brazil • CEP: 05001-100
